## EIDL AD 2.4 HANDLING SERVICES AND FACILITIES

1	Cargo handling facilities:	Contact Aerodrome Operator
2	Fuel/oil types	JET A1,
3	Fuelling facilities/capacity	1 Truck 10,000L JET A1
4	De-icing facilities	AVBL Mobile Unit
5	Hangar space available for visiting aircraft	40Mx30M
6	Repair facilities for visiting aircraft	Nil
7	Remarks	Handling services AVBL within AD HR by arrangement with the AD. Out of hours available upon request.

## EIDL AD 2.5 PASSENGER FACILITIES

1	Hotel(s) at or in the vicinity of AD	Available within 2 miles. B+B Near AD
2	Restaurant(s) at or in the vicinity of AD	At AD and in local towns.
3	Transportation possibilities	Taxis and Car Hire from the AD
4	Medical facilities	First Aid at AD. Medical Centres 10 km. Hospital 60km.
5	Bank and Post Office at or in the vicinity of AD	Bank available in Dungloe & Falcarragh. Post Office in Annagry and ATM facilities at AD.
6	Tourist Office	Tourist Information available at AD.
7	Remarks	Nil

**EIDL AD 2.6 RESCUE AND FIRE FIGHTING SERVICES**

1	AD category for fire fighting	CAT5 Scheduled Flights.
2	Rescue equipment	2 x Panther with support equipment.
3	Capability for removal of disabled aircraft	No lifting capability on site, outside contractor resources can be arranged for aircraft up to 25 tonne, please contact the Disabled Aircraft Coordinator – Airport Duty Manager email: <a href="mailto:info@donegalairport.ie">info@donegalairport.ie</a> , Tel: +353 7495 48284.
4	Remarks	Fire Cover available during Operating HR

**EIDL AD 2.7 RUNWAY SURFACE CONDITION ASSESSMENT AND REPORTING AND SNOW PLAN**

1	Type(s) of clearing equipment	2 Ploughs, 1 Brush & 2 RWY De-icer Sprayers
2	Clearance priorities	RWY 02/20 and associated TWY to Apron
3	Use of material for movement area surface treatment	KAC as required
4	Specially prepared winter runways	Nil
5	Remarks	Nil

**EIDL AD 2.8 APRONS, TAXIWAYS AND CHECK LOCATIONS/POSITIONS DATA**

1	Apron designation, surface and strength	North Apron	Surface: Strength:	Bitumen/Macadam PCR 134/F/C/X/T	
		South Apron	Surface: Strength:	CONC MTOW - 5,700kg	
2	Taxiway designation, width, surface and strength	<b>TAXIWAY</b>	<b>WIDTH</b>	<b>SURFACE</b>	<b>STRENGTH</b>
		A	25M	Bitumen/ Macadam	PCR 134/F/C/X/T
		B	12M	CONC	MTOW 5,700kg
3	Altimeter checkpoint location and elevation	Nil			
4	VOR checkpoints	Nil			
5	INS checkpoints	Nil			
6	Remarks	Nil			

## EIDL AD 2.9 SURFACE MOVEMENT GUIDANCE AND CONTROL SYSTEM AND MARKINGS

1	Use of aircraft stand ID signs, TWY guide lines and visual docking/parking guidance system of aircraft stands	Taxiing Guidance System Signboards at intersection of TWY and RWY and at the Holding Position. Guide Lines at Apron
2	RWY/TWY markings and LGT	RWY: Marked: Designator, THR, Centreline, RWY End Turnaround Areas Guidance, Aiming Point. Lighted: THR, End, Edge TWY: Marked: Centreline, Holding position. Lighted: Edge
3	Stop bars and RWY guard lights	Nil
4	Other RWY Protection measures	Nil
5	Remarks	Nil

## EIDL AD 2.10 AERODROME OBSTACLES

## EIDL AD 2.20 LOCAL AERODROME REGULATIONS

1. Landing, take-off, manoeuvring on the Aerodrome outside published opening hours is illegal unless such permission has been obtained in advance or in the event of an emergency.

2. Runway Operations and RED Runway Operational and Runway End Lights

The end of the TORA and LDA for Runway 02 is marked by a row of inset RED Runway Operational lights across the northern part of the runway, 129M from the north end of the runway pavement.

The end of the TORA and LDA for Runway 20 is marked by a row of inset RED Runway Operational lights across the southern part of the runway, 163M from the south end of the runway pavement.

The inset RED lights marking the end of the above declared operational distances are normally energised ON, and showing a red colour, when the runway is active at such times when the runway lighting is required.

In addition to these lights, a row of elevated RED Runway END Lights is installed at the extreme ends of the runway pavement to mark the physical end of the runway pavement and the limits of the Runway End Turning Areas. These Runway END Lights will normally be OFF during take-off and landing operations on the runway, and only illuminated by ATC following a landing, or prior to an aircraft commencing its take-off run, in order to mark the end of the pavement so that aircraft may safely execute a 180° turn on the pavement in the Runway End Turning Areas.

Aircraft landing on Runway 02 or Runway 20 may, after landing, taxi across the inset RED lights for the purposes of turning in the Runway End Turning Areas once ATC has switched ON the red Runway End Lights. Similarly, for aircraft taxiing on the runway to take off from Runway 20, these may taxi across the RED Operational Lights once ATC has switched ON the Runway END lights so that a turn may be made in the Runway End Turning Area.

3. The take-off run available (TORA) RWY 02 is displayed on illuminated signs adjacent to the runway.

## EIDL AD 2.21 NOISE ABATEMENT PROCEDURES

Operation is unrestricted

## EIDL AD 2.22 FLIGHT PROCEDURES

1. Arrival Procedures

Clearance to enter the CTR

Shannon ATS will clear arriving traffic to descend to the lowest useable flight level within controlled airspace (FL080/ Shannon Transition level if higher). EIDL ATC will provide the transition altitude and QNH. All aircraft below the transition altitude should use the QNH provided.

A lower level/altitude within controlled airspace may be coordinated with Donegal ATC. Clearance to enter the CTR will be provided by ATC EIDL on 129.805. Arriving aircraft to call no later than 25 DME IFN from EIDL.

Descent into the FIR (Class G Uncontrolled airspace)

**Caution:** Descent below FL080 or Transition level if higher, before the lateral limits of the Control Zone or associated stubs as outlined in [ENR 2.1](#) will bring the flight into Shannon Class G (uncontrolled) airspace. There may be traffic operating in this airspace that is unknown and not operating with a transponder. Such descent, if requested, may be given at pilot's discretion with a clearance to re-enter controlled airspace at or descending to a specified level/altitude agreed with ATC. Flight information in the FIR is available from Shannon ATS.

Arrival routes may be varied at the discretion of ATC. Arrival Routes are based on the holding pattern established at CFN.

EIDL ATC will issue expected approach times as appropriate for use in the event of a communication failure.

## 2. Communication Failure

In the event of communication failure, the pilot shall act in accordance with the communication failure procedures in ICAO Annex 2.

## 3. Reduced Aerodrome Visibility Procedures and Low Visibility Procedures

Reduced Aerodrome Visibility Procedures are approved for operations on Runway 02 and for Runway 20.

### 3.1 Reduced Aerodrome Visibility Procedures (RAVP)

Reduced Aerodrome Visibility Procedures come into effect when:

- A. The visibility on any part of the aerodrome is insufficient for ATC to exercise control over all traffic on the basis of visual surveillance; or
- B. The visibility on any part of the aerodrome is less than 1400M.

The Maximum allowable movement rate on the manoeuvring area when RAVPs are in force is 3 (2 aircraft and 1 vehicle or 2 vehicles and 1 aircraft).

## EIDL AD 2.23 ADDITIONAL INFORMATION

Strip dimensions and obstacle limitation surfaces are appropriate to a Code Number 2 Non-Precision

Approach Runway. Aircraft operators are to be aware that the full provision of runway strip, i.e. 1562m by 140m is not available in the North Eastern portion of the airfield for RWY 20 take-off operations. The full Runway End Safety Area (RESA) dimensions, as promulgated are available i.e. 120m x 60m at all times.

Full distance for RWY strip width is maintained in the RWY 02 direction to 33.5m beyond the end of the runway pavement. The fenceline then curves inwards and reduces the strip width to a distance of 36m at the narrowest point.

Wind shear and turbulence may be experienced in the lee of Mt. Errigal.

Caution wind shear and turbulence may be experienced on APP to RWY 20 in winds in the range of 250° - 300°.
