Runway 07/25 Re-Designation at Cork Airport (EICK) Due to Magnetic Variation

1. **Introduction:**

Due to the gradual shift in earth's magnetic field, the magnetic variation at Cork Airport (EICK) has changed sufficiently to require a runway re-designation of Runway 07/25. This change ensures continued alignment between runway magnetic headings and their numerical identifiers.

Details of Change:

Effective 18th February 2027:

EICK RWY 07/25 designation will change to **RWY 06/24:**

Current Designation	New Designation	Magnetic Bearing
Runway 07/25	**Runway 06/24**	062° / 242°

All associated signs and pavement markings on the maneuvering area will be updated accordingly. The change will be reflected in the Aeronautical Information Publication (AIP) Ireland, EICK AD 2 Section.

2. **Impacted Documentation:**

The following publications and systems will be updated:

- AIP Ireland (EICK AD 2 Section)
- Instrument Approach Charts and Procedures
- ATS and MET Broadcasts
- Flight Planning and Navigation Databases
- NOTAM
- Aerodrome Charts

3. **Action Required:**

Aircraft operators, flight crews and aeronautical data users are advised to:

- Update navigation databases and flight planning systems
- Brief crews on the new runway designation

4. **Contact:**

Post: daa plc,
Cork Airport,
Co. Cork.
